

First Things First,

Make Missouri Health Care a Priority!

Nearly 700,000 Missourians have no health insurance, including 106,000 children. In 2005, Missouri politicians continued to give away millions of dollars in tax breaks for insurance companies and corporations, while eliminating health coverage for 100,000 Missourians and cutting health services for over 300,000 more! Nobody in Missouri voted for that. We need to set this right and ensure that health care for children and families becomes a priority this year!

I call on Governor Blunt and the Missouri Legislature to support a common-sense health care plan that:

- Guarantees quality affordable health coverage for every Missourian
- Restores health coverage and services to those who were cut in 2005
- Makes health care for Missouri's families a priority in 2007.
